7. Precautions for Handling

7.1 Solder Cream in Reflow Soldering

Refer to the recommendable land pattern as printing mask pattern for solder cream.

- (1) Print solder in a thickness of 150 to 200 μm .

Dimensions: millimeters (inches)

7.2 Precaution for Handling of Substrate

Do not exceed to bend the board after soldering this product extremely.

(Reference examples)

- Mounting place must be as far as possible from the position, which is close to the break line of board, or on the line of large holes of board.
- Do not bend extremely the board, in mounting another component.
If necessary, use back-up pin (support pin) to prevent from bending extremely.
- Do not break the board by hand. We recommend using the machine or the jig to break it.

7.3 Precaution for Soldering

Note that rapid heating, rapid cooling or local heating will easily damage this product. Do not give heat shock over 100°C in the process of soldering. We recommend taking preheating and gradual cooling.
